DETAILED ACTION

Election/Restriction

1. Claims 1-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made without traverse in the reply filed on November 18, 2004.

Information Disclosure Statement

The Information Disclosure Statement, filed August 27, 2003, is acknowledged and has been considered.

Claim Rejections - 35 USC § 101

- 3. 35 U.S.C. 101 reads as follows:
 - Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.
- 4. Claims 22-23 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The basis of this rejection is set forth in a two-prong test of:
 - (1) whether the invention is within the technological arts; and
 - (2) whether the invention produces a useful, concrete, and tangible result.

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e. abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the "progress of science and the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. For a process claim to

Application/Control Number: 10/628,972

Art Unit: 3611

pass muster, the recited process must somehow apply, involve, use, or advance the technological arts. In the present case, claims 22 and 23 recite only an abstract idea. The recited instructions of merely receiving a signal and correlating variables using either a routine or lookup table does not apply, involve, use, or advance the technological arts since all of the recited steps can be performed in the mind of an individual (i.e. hearing two beeps and identifying that that signal means the trailer is too close). As to the technological arts (a medium) recited in the preamble, mere recitation in the preamble or mere implication of employing a machine or article of manufacture to perform some or all of the recited steps does not confer statutory subject matter to an otherwise abstract idea unless there is positive recitation in the claim as a whole to breathe life and meaning into the preamble. In the present case, none of the recited steps are directed to anything in the technological arts as explained above with the exception of the recitation in the preamble of a computer readable medium. Looking at the claim as a whole, nothing in the body of the claim recited any structure or functionality to suggest that a computer performs the recited steps. Therefore, the preamble is taken to merely recite a field of use, and claims 22-23 are deemed to be directed to non-statutory subject matter.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

6. Claims 22-23, as best understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Wall et al. (U.S. Patent No. 6,480,104).

Wall et al. discloses a computerized system comprising all steps as claimed, including receiving a signal from a sensor, the signal comprising positional variables representing relative angular positioning of a towing vehicle and a towed item, and correlating the positional variable using at least one of a routine and lookup table, and displaying the relative angle (see column 4, lines 1-8) to a user, which would inherently be in degrees or radians.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mills et al. (U.S. Patent No. 6,222,457 B1), McGregor et al. (U.S. Patent No. 6,801,125 B1), Piper et al. (U.S. Patent No. 6,769,709 B1), Beasley et al. (U.S. Patent No. 4,938,495), Nelson (U.S. Patent No. 5,191,328), Otterbacher et al. (U.S. Patent No. 6,100,795), and Malisch et al. (U.S. Patent No. 6,179,319 B1) disclose computerized systems for receiving angular data from a sensor and relaying or displaying determined information to a user.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Avraham Lerner whose telephone number is (703) 308-0423. The examiner can normally be reached on M-F (8:15-5:45) first Wednesday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lesley Morris can be reached on (703) 308-0629. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
